SMART
ADHESIVE
APPLICATION
SYSTEM

Perfect for seam tape bonding with Turfstikk MS210, the multiiiiibead dispensing gun is a clean and precise method of applying adhesive to seam tape. Clean, fast, and ergonomic, you could be looking at finishing the job up to FIVE times faster than traditional dispensing methods.

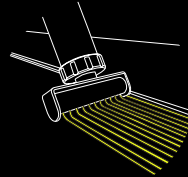

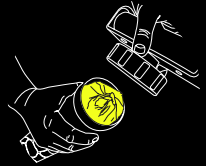

STAGE 1

Insert adhesive sachet into barrel and cut off the sealing clip.

STAGE 2

Screw the dispensing head into the barrel.

STAGE 3

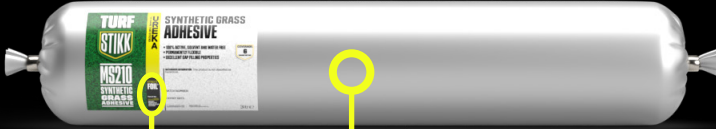

Apply constant pressure to the trigger to dispense the adhesive.

STAGE 4

The used adhesive sachet forms a small disc for easy disposal.

TURFSTIKK MS210 MS POLYMER SYNTHETIC GRASS ADHESIVE

Used with the multiiii bead dispensing gun, Turfstikk MS210 is a fast curing, one component, hybrid polymer adhesive designed for bonding synthetic grass to seaming tape. Turfstikk MS210 is a high grab adhesive which ensures the seaming tape and grass are kept in place while the cure takes place. Turfstikk MS210 will also bond many other porous and non-porous substrates in construction applications.

- Fast curing
- Bonds synthetic grass to joint seam tape
- Bonds most substrates
- Solvent and water free
- Bonds in damp conditions
- Odourless
- Excellent durability in all atmospheric conditions
- Colour: Green

SIZES AVAILABLE:

- 3ltr sachet
(30 linear metres)
- 1.5ltr sachet
(15 linear metres)
